---

## SUMMARY

Full-Stack Web Developer skilled in building dynamic web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Experienced in front-end and back-end development, with expertise in JavaScript, React, Redux, and Tailwind CSS. Strong problem-solving abilities and a commitment to delivering scalable, high-quality solutions.

---

## PROJECTS

### MindSpark

- A comprehensive online learning platform enabling instructors to create assignments, conduct live classes with real-time chat, upload videos, and track student submissions. Students can participate in live sessions, submit assignments, access quizzes, manage subscriptions, and receive event notifications, all through a personalized dashboard.

### TechScan

Mar 2021 - Dec 2022

- A tech blog providing detailed reviews, product comparisons, and the latest updates on gadgets and technologies. It features interactive charts, expert opinions, and a search option for category-based browsing, helping readers stay informed and make smarter choices.

### QuickCart

Feb 2020 - Jan 2021

- An eCommerce platform providing seamless shopping experiences with a dynamic cart system, real-time product updates, detailed product pages, and a responsive interface optimized for all devices.

---

## EDUCATION

### Bachelor of Technology (B.Tech)

July 2018 - July 2021

Parala Maharaja Engineering College, Berhampur, Odisha

- Actively participated in coding competitions, consistently ranking in the top 10.
- Served as a team lead in multiple academic projects, ensuring timely completion with innovative solutions.

### Diploma

August 2014 - August 2017

Government Polytechnic, Berhampur, Odisha

- Relevant coursework in Structural Design and Project Management.

---
